

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2qr7-hv2s
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8534
Comment on FR Doc # 2025-02305

Submitter Information

Name: Michael Gross
Email: [REDACTED]

General Comment

AI can be and has been used to steal IP from humans, ignoring copyright. AI does not create original content; it merely regurgitates what has been feed into it. Further, AI does not operate on an algorithm created by its programmers; it operates as a "black box," where even the programmers The recent push by the US Government to exempt generative AI from copyright amounts to an attempt to legalize IP theft for large corporations, and it would impact individuals and small businesses very negatively. A computer can never be held accountable, so computers should never be given the ability to steal the results of human labor and creativity. DO NOT exempt OpenAI or any other generative AI system from copyright law. Doing so would simply allow large corporations to pillage the property of American citizens without consequences.
