

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2rj8-okvq
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8544

Comment on FR Doc # 2025-02305

Submitter Information

Name: James Mason

Email: [REDACTED]

General Comment

Generative AI uses large language models (LLMs) that cannot get any more sophisticated than they currently are. These models need to be continuously fed new data to in order to learn more. Having already exhausted available data sets (comprising in part stolen copyrighted creative works) the only method available is to use other LLMs to generate new data and feed this into the LLM. This process causes continual deterioration of the intelligence of the system until it is only able to output nonsense.

Investing as a nation in these technologies is a huge risk in the short-term and financial catastrophe in the long-term.
