General Comment

What we are referring to here as a.i. is not a.i.. It is not a massive innovation that could change the future. It is a means to steal the hard work of creators via an easy to deny algorithm which magically make theft legal. Not only should the government not support this, it should support efforts to dismantle the rapidly expanding ring of thieves and support the creative writers, artists, filmmakers, and actors who have made the USA the dominant force in entertainment for the last century. If we do not cap this now, there will be no wrangling it. And nothing produced under this model will be distinct or original. We stand to lose the thing that most makes us, us - our innovation and creativity - in the name of a short term easy buck.
