General Comment

Please we are just trying to survive. I'm a digital artist and designer. If AI is being used to do something like identify cancer cells in a petri dish that's great. If artist's work is being used without their permission to train AI (which it has been) to make images for free so artists no longer have to be paid, or god knows what else, that's not advancement. It's the enshittefication of America.

I do not believe AI holds a place in the future of the US

AI steals from my livelihood as an American and profits off of theft

AI is overhyped and is fleecing the eyes of the American public.

We NEED regulations on AI. We need to make ethical choices. Regulations are for the protection of the American public.
