General Comment

AI should not have a future if it subverts copyright laws to steal from artists, musicians, writers, etc.

Copyright laws were made to stop people from stealing other's creations, so why should an AI be allowed? Training an AI to steal is still theft.

If AI is allowed to model itself after copyrighted material, then copyright laws are moot.

This would dramatically hurt creatives who are trying to make money from their passions. AI should not be a tool to steal from those who are already struggling to get by. All this will do is hurt people who pour their heart and soul into creating their works.
