## General Comment

I am a professional writer, a book author, and a professor. We should absolutely not be granting OpenAI and similar generative AI companies free rein to use copyrighted material to train their large language models and other generative AI projects.

We have a rich history of copyright protection in this country, and it can't and shouldn't be undone with the stroke of a pen in the name of progress. Show some respect for those of us who have worked and sweated through the process of developing creative material.

Do not build the future on stealing from the past and present. If generative AI can only exist through theft, perhaps we should be asking ourselves if it should continue to exist at all.
