General Comment

Large Language Models, like ChatGPT and other so-called "AI" technologies are only possible via large-scale unauthorized use of materials under copyright. It is a perversion of justice to hold individuals to a standard of copyright law that large corporate entities are not held to-- why is it okay for OpenAI to wholesale utilize works that are under copyright when Aaron Swartz was arrested and sentenced to fifty years of jail time and a million dollars in fines?

AI companies should be held to the same standard of copyright law as every American citizen.
