General Comment

Government should NOT be involved in Generative AI. It necessitates the stripping of American education, intelligence, and creativity and, based on the absolute vitriol with which the forcible shoving of AI into industry has been met, it is not a boon to our economy. MO ONE WANTS THIS. And no one wants to spend our tax dollars to allow billionaires to rape our work and keep the profits.

There is NO path forward in which government facilitation of AI development is useful, profitable, or helpful for Americans.
