General Comment

If a company cannot properly do the due diligence of properly selecting which data they are allowed to use to train AI, I see no reason to believe what they end up creating will be the best available. Allowing sloppiness in creation of AI, when it is being made by the organizations with some of the most resources in the country, and indeed the world is ridiculous. These countries should be working within the existing structures that exist for every other American.

They should not just be given shortcuts beyond what all others have when they have all these resources available.
