Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8624

Comment on FR Doc # 2025-02305

Submitter Information

Name: None Ofyour

Address: Business,

Email: [REDACTED]

General Comment

AI needs to be heavily regulated and never allowed to harm a human being. To make it clear:

+ It should never be allowed in any creative field nor should it be allowed to take jobs from human beings when quality of life is directly tied to income, and we already have income inequality.

+ Get it the f&^% out of my spaces. It should not be allowed to monitor, spy on, or falsely flag Americans (which it often has, in criminal profiling cases they've wrongfully flagged innocent civilians).

+ It should only be used to identify cancer and other such pursuits, to facilitate in early treatment and safety of the human population.

Tell windows to get its f&^% AI out of my face and out of our lives. Tell the tech bros to get it out of our electronics before we smash it out.
