General Comment

I am a high school teacher. I am very concerned at the push for teachers to use generative AI/LLMs in the classroom. The lack of ethics around the technology communicates exactly the wrong things to our students. Students learn that taking work without credit and reproducing it or regurgitating it as their own constitutes "writing" or even "thinking." This is a danger not just to academics but to America, as a future generation of potential scientists, doctors, educators, and, yes, CEOs and politicians are going to lack the critical thinking skills and ethical compasses they will need to "make America great."
