General Comment

I think AI has no place in the future of America, it detracts from people pursuing a the American Dream if others can freely take their work without compensation. We are telling the American individual they do not matter to pursue and protect their ideas. Our strength has come from the freedoms people feel — knowing their ideas are copyrighted and protected — to come up with things that will make the future of america great. We cannot rely on AI to rehash on what has already been done and prevent the future creativity.

I am an artist, I want to know that my fundamental rights are protected. That I am not some product to be stolen from. That the future of this country I love is not to be plundered.

Furthermore, we already have studies coming out that AI restricts the ability for humans to come up with more solutions. For our protection, great minds, and future once more we must not let AI run rampant because it is a pretty new toy. No, we might fight for the people who make this country great. The artisans and the thinkers who we idolize so greatly. We lose out on our culture significance and power as a nation by caving so carelessly the whims of AI tech corps.

Say no to AI, say yes to the American people.
