General Comment

This administration's AI Action Plan should focus not on giving away creator content to Big Tech companies, but rather on ensuring a fair marketplace with competition:

First, the government should ensure that creators and everyday Americans give effective consent, so that we can decide when and where our work is used by AI systems.

Second, the AI Action Plan should encourage a robust licensing marketplace, so that the incentive to create for small businesses is preserved. Our work has immense economic value, so the value generated by that work should accrue to the original creators, not just Big Tech.

Finally, the AI Action Plan should require transparency from Big Tech companies, requiring them to disclose what material is in their training datasets, and label what content is AI generated.
