General Comment

Giving AI companies full control over training their systems on content that specifically does not belong to them threatens not just copyright laws and artists,' but privacy and data from others as a whole. Personal information or conversations discussed online is at risk of being used by these companies. The internet is currently being used by 5.56 billion people. 5.56 billion people's information and content is at risk of being used without consent. I fear you may also be at risk of your information being used too.
