As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2yfi-q1y4
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8702

Comment on FR Doc # 2025-02305

Submitter Information

Name: Chris J

Email: [REDACTED]

General Comment

Allowing a company to steal from literally anyone is outrageous and disgusting. Discoveries stolen from the proper founder, art pieces scrapped from their artists, literary works plagiarized from their authors. It's jaw dropping that it's even up for question but AI should have no creative part in society. AI should be used to make the laborious jobs easier not give us more time to do backbreaking work. The filth that is AI generation shouldn't be anywhere near our lives let alone have protections. People caught tracing or plagiarizing are punished but why is it ok if a program does it? Forgeries are frowned upon but greed ridden people want to be protected from the consequences. AI is not fair use. AI is theft. It's been proven that AI is not solid and should not be depended on as it can give no growth or feedback or explanation for its actions while people can do just that. Different minds can see from different angles while AI tries to find angles in a circle. It does not work. Allowing AI into our lives will do more harm than good. AI should not have protections. There's nothing protecting thieves so why should a program be given those protections? AI is a plague and letting it grow is a mistake. It's infested in every part of peoples honest lives and ruining them. AI is a disgusting thief, a wrongful tool, and should NOT be protected.
