General Comment

Generative AI is theft. Generative AI takes uniqueness and creativity and pushes it through a corporate &^%, using processes that under any reasonable persons understanding would be flagrantly illegal and immoral. Generative AI has already made many parts of the internet measurably worse, pushing out hallucinations to a degree that is straight up laughable. Generative AI is destroying our planet and setting our atmosphere on fire at a ridiculous rate for very little upside, just the possibility that our oligarchs could be able to lay off their employees and keep a customer base, even with a far inferior product.

Most people don't want to read AI books, watch AI movies, listen to AI music, look at AI art, or even want AI answers on search engines. It's all so incredibly stupid and exploitative.
