General Comment

Generative AI is built off the constant theft and copyright infringement of numerous digital artists who did not give permission for their work to be used in this way, and they have no way to opt out once their art enters the algorithm. To support GenAI at this state is to dismantle the idea of copyright entirely, removing it from everyday citizens and making it a protection only the rich and elite can enjoy. Supporting GenAI tells your voters that you do not care about them, or their creativity, or their passion, and only the money you get from the wallets of those who want to exploit them. A vote to support GenAI is a vote to lose your elected position at the next opportunity.
