

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-2nv5-wpim
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8760
Comment on FR Doc # 2025-02305

Submitter Information

Name: Esther Lee
Email: [REDACTED]

General Comment

I am extremely against big tech companies stealing copyrighted work and threatening the livelihoods of American citizens across the country. These AI systems wouldn't even exist without the unethical data-scraping done by Microsoft and Google.

We have copyright laws for a reason—to protect creatives and their creations. We own our creations, not the big companies stealing and profiting off our labor! It is imperative that we have regulations on AI, but firstly, we cannot make exceptions for corporations vying to rewrite copyright law in their favor.

OpenAI is not considering the American people. They are fully willing to crush small businesses and jeopardize the artists, programmers, and inventors without whom big tech would not exist. AI is also massively over-hyped, and they are scrambling for any reason to continue stealing from the American public, because it is no longer viable if they can't train on OUR data for free. Even they know that AI has no future in the US if they don't make up reasons to use it (ie: national security).

What I want is transparency, the disclosure of material used in AI datasets, and the ability to consent to AI training. A hidden "opt-out" button is not enough—the default selection should be opt-in, NOT opt-out.

I am sincerely asking that you take into account the concerns of individual citizens. Big tech will absolutely be using AI to replace real, working employees in order to maximize their profits, all while stealing copyrighted works to train their datasets. Granting OpenAI immunity from lawsuits regarding copyright infringement would be simply unthinkable.

Thank you for your time.
