General Comment

AI should never be allowed to pursue any action that brings real harm to human beings. It should not exist outside correct applications, it is a tool that requires heavy and strict regulations with severe consequences for misuse. It should not be used in marketing. It should not ever take the place of a human if a human is adequate or if a mistake could cause harm. A human can be held responsible, a program cannot. It is infinitely harder to hold those who misuse AI accountable if there are no strict regulations in place. Currently, AI is being used to destroy human lives. Make it stop.
