As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-34h8-8hfp
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8846

Comment on FR Doc # 2025-02305

Submitter Information

Name: Alexis Candelaria

Email: [REDACTED]

General Comment

AI (also known as LLMs) are, quite simply, a scam. They are overhyped corporate garbage that literally has no more benefit to the public than currently existing search engine technology; far less, in fact, because AI is extremely detrimental to our society and culture in multiple unique ways. At a very basic level, almost by definition, it urges people to relinquish their cognitive faculties and stop thinking for themselves.

Additionally, AI steals flagrantly from hardworking creatives, people who have honed their skill via blood, sweat, and tears, by hoovering up their work without their consent and then at the press of a button vomiting out partially digested slop facsimiles. Every AI company and executive should be prosecuted out of existence; they are thieves on a hitherto unknown scale. Even considering allowing LLMs to be trained without any restraint of copyright is downright shameful, not to mention a torching of the jobs market politicians claim to care so much about.

Data security and legal/privacy concerns already abound around AI as it unfortunately exists now. It would be a catastrophe if it were allowed further unfettered access. I don't trust ANY corporation to have my best interests as a citizen at heart and these AI companies explicitly care about nothing except enriching their executives at the expense of ordinary people. They are venal, greedy, and I don't want them to get anything more out of us than they already have.

Further, the environmental impact of AI, due to its power consumption, is absolutely horrendous. In a time it is imperative we move away from fossil fuels, AI is exacerbating the existential threat of climate change by moving us back toward coal-generated electricity simply due to the scale of its demands. This is inexcusable and ridiculous.

AI should hold no place whatsoever in the future of the United States or any other country. I urge whoever is reading this to NOT cede any further ground to AI or its proponents. Stop this immediately!
