General Comment

This technology is already costing Americans their jobs as it is. Removing any semblance of restrictions, allowing corporations to steal anything and everything under the pretense of "innovation," accomplishes nothing but further consolidating economic power to a small handful while even more Americans are left unemployed. If even copyrighted material is free fodder for generative AI, what incentive does any American in any creative industry have to make anything anymore? What's the point in trying to win a technological arms race with other nations if it comes at the cost of our own people's economic and creative wellbeing? Are we to sacrifice all current and future artists' livelihoods on the pretense of "security"?
