General Comment

Artificial Intelligence is not a technology that we should be investing and developing. It is an innactuate, copyright infringing, plagiarism spewing cesspool of code that requires vast amounts of power and water to fuel.

AI has been foisted upon us by the morally, and creatively bankrupt who only see it as a means to eliminate the human element.

People do not want this. Artist, writers, animators, voice actors, acting guilds, and many others have protested the use of this kind of technology as a threat to not only their livelihoods, but to art itself.

And yet it is being pushed by tech giants, and others who see this as an opportunity to "save money".

Yet the average person bewails having to opt out of their data being collected for AI. Having to opt out of AI features in their phones, computers, and software.

Protect the American People's Privacy. Protect us from buying the scam that is AI.
