General Comment

I do not believe AI holds a place in the future of the US; as steals from my, and many other people's; such as Artists, Musicians, and educators, livelihoods as an American and profits off of theft. Also, despite the massive push for it, AI is overhyped and is fleecing the eyes of the American public. Much of the American public is seeing not only the economical downside of Generative AI, but also Ecological damages Generative AI inflicts on the planet as well, and thus not many people wish to use it.
