General Comment

If your goal is to "secure a brighter future for all Americans" this isn't the way to do it. I, as well as many others, do not consent to having everything I post online scraped for AI training. I am an artist by trade, and my livelihood and ability to obtain and sustain gainful employment is being jeopardized by the rise of AI being used by companies in place of humans to do creative work. I do not want private companies to be able to steal my intellectual property without consequence.
