General Comment

AI causes harm to the American people:

Environmental harm, because the data centers behind generative AI require a ridiculous amount of energy and water— Energy and water priced out of the hands of US citizens.

Economical harm, because of the jobs it's taking away from American workers in the creative sector.

Intellectual harm, because the widespread use and influence of chatGPT has been catastrophically detrimental to the developing minds of students in our education system. Not to mention the inaccurate hallucinatory information it provides in search engines, making previously reliable tools like google practically useless.

AI without regulation is harmful to this country.
