General Comment

I am disgusted at the pure incompetence that the US government is showing at this moment. Openai and such companies should be withheld to the laws of art. AI is meant to help with things we don't want to do, not replace the things we WANT to do, such as art and music. Thanks to AI, art is turning the community of art into a wasteland of uncreativity and souless, machinemade art. Nothing that could be created with a person holding a pen and paper. This is disgusting, and effectively destroying art as we know it online.
