General Comment

This proposal is a ludicrous and disingenuous attempt to utterly devalue all intellectual property--not to mention flout copyright laws--to further empower and enrich tech oligarchs in the supposed name of the greater good. Generative AI is not, in fact, AI, but is rather a waste of power and destruction of the environment to create a more powerful predictive text algorithm. The fact that their industry survives only thanks to regular injections of cash from venture capitalists should be an indicator that there is nothing of any value there, and for you to pronounce that all intellectual property is now beholden to their cynical and empty efforts is appalling.
