Email: [REDACTED]

General Comment

I am a writer who produces non-fiction technical documents, as well as fiction for sale and publication. Allowing OpenAI unfettered access to my work *without permission and compensation* is a violation of my copyrights and downright theft.

I do not believe AI, in particular generative AI, holds a place in the future of the US.

AI is overhyped and is equivalent to the false promises of cryptocurrency and NFTs. There is no reason for its current existence other than to artificially inflate shareholder value.

AI produces bad information and bad art. It needs strict government control along the lines of pharmaceutical development.
