As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-38k1-alwb
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-8932

Comment on FR Doc # 2025-02305

Submitter Information

Name: Greg Vinciguerra

General Comment

I am a voice actor who used to do visual art. Seeing the tech sector ravage not one but two disciplines I have poured years of study into over the past handful of years has been horrifying. These models have trained off of my friends' and colleagues' work against their will without their consent and without giving them any compensation to even make up for the loss of work involved.

SAG-AFTRA has had to go on strike multiple times to protect actors from studios taking advantage of this technology to replace them with uninspired, soulless replicas.

Former president John Adams once famously said, "I must study politics and war that my sons may have liberty to study mathematics and philosophy. My sons ought to study mathematics and philosophy, geography, natural history, naval architecture, navigation, commerce and agriculture in order to give their children a right to study painting, poetry, music, architecture, statuary, tapestry, and porcelain." We were not given the right to study the arts through the sacrifices of our forefathers for those fields of study to be rendered obsolete by machines. AI, if it must exist, ought to be doing menial drudgery so as to free our time up so that more of us have the right to pursue creative fields, not steal those creative fields so humans are stuck with nothing to look forward to but menial drudgery.

Generative AI has no place in any artistic field. Please stop shoving it into everything. Thank you.
