General Comment

A.I. should follow copyright regulations just like anything else would, without permission it is effectively stealing content from people who make it, hiding the owner(s) of the original work and marking it as it's own.

In this sense, A.I. that does not follow copyright is akin to plagiarism, and should be treated as such.

Alternatively, A.I. should be created with permission and credit to the people who's works are included in it's making, so that those who's work are in an A.I., are also credited for it's creation.
