General Comment

As an artist whose visual work is online in multiple locations, I am appalled that we are considering giving AI developers unlimited permission to “scrape” the internet for visual, literary, and aural content for learning models. Human creators are bound by copyright laws; “fair use” is strictly limited unless a work is in the public domain. Why should AI companies not be bound by the same laws? Allowing these companies to feed on artists’ work—which may be the culmination of years of study, experimentation, and labor—without remuneration is theft.
