General Comment

I do not believe AI holds a place in the future of the United States. It profits off of theft, and steals from the livelihood of myself and many other Americans. The public needs proper safeguards, and should be properly compensated for the use of copyrighted training data.

Removing guardrails and developing AI without safeguards and compensation would be disastrous. It is an unethical, dangerous, and honestly embarrassing precedent to establish. This will not benefit our national security.

The American people deserve better.

We don't need or want AI.
