General Comment

I do not believe AI holds a place in the future of the US

* AI steals from my livelihood as an American and profits off of theft

* AI is overhyped and is fleecing the eyes of the American public.

Hello,

In recent years, there has been a well meaning push towards Artificial Intelligence, however the recent situation has gotten out of hand and has blown up astronomically. Companies and individuals do not respect the rights of others and it is uphauling to witness. I do not believe that AI is sustainable or right for the future. It is something, much like cryptocurrencies, NFTs, or any other quick grab for attention or money. It will not last, and most abhorrently image creation actively steals without compensation or emotion. It cannot go on.
