General Comment

Generative AI is a product that can only learn about past and present. Its knowledge only exists in a bubble, and its output is not truly original at all as it is an amalgamation of all known inputs (that are more likely than not copyrighted works). It is unethical, and its investors are connen. Please do not promote the development of Gen AI, and focus on better technological alternatives. OpenAI cannot be trusted as a company to have ANY government contracts or funding.
