Organization: Frankly Fun Dog Training Limited Liability Company

General Comment

I do not believe AI holds a place in the future of the United States

AI steals from my livelihood as an American and profits off of theft of my labor. ART is Labor!

AI is wasteful and doesn't do anything we can't already do better and more accurately.

It's lazy and wasting resources.

I find it ethically and morally wrong to train a computer to steal from human artists.

It's also unethical to give AI the opportunity to make decisions that only humans should make, such as life-saving medical decisions. It is anti-democratic and will lead to fascist policies because we will be unable to train human bias out of the AI, and once the computer is making these decisions there will be no human that can be held accountable, giving companies free reign to treat the populace however it likes, as long as a computer has done it and not a human.
