General Comment

Ban the use of generative artificial intelligence. It has done nothing but destroy jobs, steal, and benefit large corporations who make everything worse. It's completely unsustainable and costs an excessive amount of energy to use. At one point, OpenAI, owners of ChatGPT, was losing \$700,000 a day just running the service. It has no place in our future, and we are counting on you to do the right thing and not allow AI models to be exempt from copyright law.
