General Comment

Any AI action by the federal government that neglects the real human and economic cost this has on American workers (and normal people) is a complete giveaway to the richest and most powerful people in the world. AI threatens the livelihoods of millions of American workers at all skill levels, and there must be guardrails to protect these workers. AI imagery (and other Generative AI content) also threatens American social fabric with misinformation and DeepFake imagery that can be used to falsely incriminate anyone or produce nonconsensual sexual imagery. Worker protections must be put in place to protect the worker, not allow Big Tech to roam free under the guise of "innovation." If the US government allows AI to run rampant in our society and our economy, devastation and chaos will ensue as our country and economy become less human.
