

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-3d4r-way6
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-9046

Comment on FR Doc # 2025-02305

Submitter Information

Name: Scott Brown

General Comment

Intellectual property and copyright protection MUST be at the very core of any AI policy moving forward, these companies should not be allowed to take and remix copyrighted works of art, be they film, photography, music, illustration, etc without expressly granted permission from rights holders.

Personal data protection is also a massive concern. How many children's faces have been added to these databases without their guardian's permission? How many medical records have been scraped?

Any company using a database of media to train their AI must be required by law to make their training sets publicly accessible and auditable. They must be easily compelled to remove copyrighted work by rights holders, or personal information and photos of individuals who wish to remain omitted.

In addition to laws that compel AI companies to be transparent and open, but we also need new protections for individual data privacy.
