General Comment

Speaking as a small time illustrator, I am concerned with the implications of allowing AI to freely train on copyrighted material. Creative fields are very competitive and it is already difficult for small businesses and individuals to control the use of their creations. It also stands to harm the reputation of larger companies and their intellectual properties, the very reason entities like Disney strictly pursue legal action. As valuable as AI may be as a tool, it currently seems to be too easily capable of creating deepfakes, bootleg merchandise, and flooding spaces for hobbyists and professionals with low effort, rapidly churned out works.

Encouraging this type of training stands to further damage the creative and entertainment sectors and their contribution to our economy and culture as Americans.
