General Comment

AI must be bound to copyright laws like every other individual. Calling copyright laws “unnecessarily burdensome requirements” is a slight to every American creator, director, producer, publisher, et al. While people can certainly make works derived from copyrighted material, they can’t outright use the copyrighted material. AI, on the other hand, needs to “directly use” copyrighted material(via a library, database, so on.) An AI should be forced to adhere to the same copyright laws as every other individual.
