General Comment

This will weaken copyright protections for all artists and writers, both independent and for corporations. Why is stealing intellectual property okay when running it through machine learning that can copy parts wholesale versus an individual stealing it? Once an exception is made for one company, others will also ask for exemption and it will be impossible for individuals to protect their work to keep their livelihoods. People deserve to be compensated for their work. Companies should pay for data instead of profiting off of stealing the data.
