General Comment

I am a working graphic designer and illustrator, generative AI is increasingly harming my client base, the trust audiences have in artists and decreasing the perceived value of the work I create.

All AI tools are built on stolen work and AI has already trained on my copyrighted work which I have NOT granted it permission to use.

Those of us in the creative field have no recourse against these companies who are scraping the entire internet while also showing blatant disregard for copyright, professional integrity or a single care for how they are destroying whole industries.

AI must be barred from using copyrighted material, full stop.
