General Comment

Large Language Models and other products marketed as “AI” should not be allowed to circumvent copyright law, which is one of the foundational underpinnings of our capitalist system. If no one’s commercial rights to their own output are respected, innovation will slow and then cease, and we will find our country further and further behind the world until we are no longer able to keep up. The American we know today will become an unrecognizable shadow of its former, world-leading glory.
