General Comment

This is a joke. The "unnecessarily burdensome requirements" in this is the copyright laws that protect everyone else from having their work stolen. It's the law of the land and should not be open to special carve-outs for AI companies just because their useless, wasteful application does not work without theft. Not just some theft. The most theft. The theft of absolutely everything that has ever touched the internet. It undermines the hard work of everyone but these AI companies and all for a huge waste of energy and resources that costs more than it earns and is only buoyed by a speculation bubble.
