Document: NSF_FRDOC_0001-DRAFT-9126

Comment on FR Doc # 2025-02305

Submitter Information

Name: Alyssa Read

[REDACTED]

General Comment

Putting government backing behind AI will create massive security risks, allowing bad actors to scrape government data, personal data, and the work of both small creators and the biggest corporations in the country, all to claim to create an intelligent machine, that is actually nothing more than an algorithm pretending to be smart.

AI has already put millions of Americans out of work, or drastically reduced their workhours and pay. DO NOT support the continued theft of copyrighted information and personal data!
