Document: NSF_FRDOC_0001-DRAFT-9128

Comment on FR Doc # 2025-02305

Submitter Information

Name: Robert Whitfield

General Comment

Good grief, are you kidding? You're seriously of the belief that AI, as system that has been proven to worsen critical thinking skills thanks to Microsoft's recent study, as well as not even be reliable in the first place with it being wrong 60% of the time on Google alone, is the way of the future? THAT'S embarrassing. This crap system is somehow even more mediocre than NFTs were, actively has led to court cases as a result of deepfake pornography issues, and been caught blatantly stealing from others' created works.

AI is a garbage excuse for an assistant for any kind of info available and can be manipulated to do things it's not supposed to do without much effort, breaking any rules you could possibly set for it to turn it against you, making you look even dumber than you already are by using it. This is what an idiot's idea of a brilliant program is. Are you willing to be ridiculed even further by supporting AI? Surely you want to save face after everything that's happened with Elon Musk already, I mean really. Don't stoop to this level. You can do so much better than this. I don't approve of this and neither should you or anyone else.
