General Comment

“This document is approved for public dissemination. The document contains no business-proprietary or confidential information. Document contents may be reused by the government in developing the AI Action Plan and associated documents without attribution.”

AI companies must fairly compensate creators of any intellectual property work that is included in training data. By avoiding compensation and using material under copyright protections without authorization, creators have become increasingly unwilling to create new works and are creating blanket bans on using existing works in any AI training set.
