## General Comment

I believe the harm that would be done to Americans by weakening the rights they have to their own intellectual property would be much greater than any good that could come out of the development of generative AI products. This technology is experimental at best and I do not see a future in which it will become more crucial to our society than the right of a creator to decide who can or cannot use their work. Please reconsider the execution of this decision so that legal protection of intellectual property is not infringed upon.
