Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-9140

Comment on FR Doc # 2025-02305

Submitter Information

Name: Bryan Smith

General Comment

AI models are trained extensively using copyrighted material, which is stolen and used to produce derivative work.

The government should NOT be making carve-outs to existing copyright law at the behest of a handful of venture capital-funded tech startups. The only benefit of AI is to employers and executives, who will use it to cut "redundancies" by displacing human workers, further compounding an already growing unemployment issue.

If AI is to be trained on copyrighted work, they must be legally compelled to license that work, just like musicians must license song rights to perform covers.

Surely OpenAI has received enough funding to be able to facilitate such a licensing scheme. If not, they should be left to collapse under the weight of the market.
