

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-3hnp-2adn
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-9168

Comment on FR Doc # 2025-02305

Submitter Information

Name: Tiffany Sexton

[REDACTED]

General Comment

AI is a great tool for inspiration, but having it go unchecked and without copyright laws, people could have their work trained off of and stolen or even be defamed with deep fakes. Tech companies would be taking job opportunities to those who deserve them. Without regulation, the talented artists, photographers, musicians, and countless others who have helped train these programs will find themselves without jobs as massive corporations find ways to weasel out of having to pay them by having an environmentally harmful method of creation do the work lifelessly, and at the press of a button.

This will also cause issues for those who create AI content. Many who do are already disliked. When an artist with a large following sees that their art has been used to train something, and the AI creator is not legally obligated to credit them, the internet will do what the internet does best. It will doxx, harass, and do anything to put these people in harms way. It's best to have the precautions set up now before the people take matters into their own hands.
